

With automotive packaging, there's no spinning our wheels.

When it comes to car care and performance, Altium knows how to package it. We offer advanced barrier layer chemistry that can be extruded into our bottles to allow for the safe containment of additives and supplements with aggressive chemicals. Whether it's gasoline additives, brake or steering fluid, motor oil, windshield treatment, antifreeze, or gear lubricant, you need containers that are easy to handle and safe to use.

If your product helps a car go, turn, or stop... pull up and let's talk packaging.

Automobiles come in all makes and models. Altium is doing our part to preserve cars and keep them running their best.

Popular options include:

- Neck Finish
- Color
- Handle
- Labels
- Barriers
- Post-Consumer Resin
- View Stripe
- Lightweighting
